

\$93,887.75	\$227,862.35	\$35,568.00	\$357,318.10
26.28%	63.77%	9.95%	9.95%

Am using Cognos 11. Above crosstab should say 100.00% in bottom right corner. Otherwise it works fine. Properties of bottom right cell are:

Detail aggregation	Total
Summary aggregation	Total

The 3 bottom % amounts are a query calculation. They just do not add up. Is taking the last amount (9.95%) and using that in bottom right corner. Why would that be ? Thank you.
